# Seminar on Emerging Toxins

**May 21-22, 2012**  
**Vigo-Pontevedra, Spain**

| PROGRAM                                                 |                                                                                                                  |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| OFFICIAL OPENING OF EURLMB & SEMINAR ON EMERGING TOXINS |                                                                                                                  |
| MAY 21                                                  |                                                                                                                  |
| 10:00-11:00                                             | <b>Opening Ceremony &amp; Tour around the EURLMB facilities</b>                                                  |
| 11:00-11:30                                             | <b>Coffee Break</b>                                                                                              |
| 11:30-11:45                                             | <b>Introduction</b>                                                                                              |
|                                                         | <b>Dra. Ana Gago Martínez</b>                                                                                    |
| 11:45-12:30                                             | “Determination of toxins involved in ciguatera and related seafood toxins”                                       |
|                                                         | <b>Dr. Takeshi Yasumoto</b>                                                                                      |
| 12:30-13:00                                             | “Acute sub-acute oral toxicity of palytoxins”                                                                    |
|                                                         | <b>Dra. Aurelia Tubaro</b>                                                                                       |
| 13:00-13:30                                             | “An update on cyclic imines: Occurrence of pinnatoxins and spirolides in Norway”                                 |
|                                                         | <b>Dr. Chris Miles</b>                                                                                           |
| 13:30-15:00                                             | <b>Lunch-Break</b>                                                                                               |
| 15:00-17:30                                             | <b>Roundtable &amp; Discussion</b>                                                                               |
| MAY 22                                                  |                                                                                                                  |
| 9:30-10:00                                              | “Cyclic imines in France-similarities and differences between SPXs & PnTXs”                                      |
|                                                         | <b>Dr. Philipp Hess</b>                                                                                          |
| 10:00-10:30                                             | “Coupling bio-analytical & physicochemical methods for cyclic imines detection”                                  |
|                                                         | <b>Dr. Romulo Araoz</b>                                                                                          |
| 10:30-11:00                                             | <b>Coffee Break</b>                                                                                              |
| 11:00-11:30                                             | “Integrating the survey of emerging toxins in monitoring programs.<br>Interaction between management & research” |
|                                                         | <b>Dr. Jorge Diogène</b>                                                                                         |
| 11:30-13:30                                             | <b>Roundtable &amp; General Discussion</b>                                                                       |
| 13:30-15:00                                             | <b>Lunch-Break</b>                                                                                               |
| 15:00-18:00                                             | <b>Working Group on Emerging Toxins Meeting</b>                                                                  |
|                                                         | *(ONLY Experts from EU National Reference Laboratories involved in this WG)                                      |
| 18:00-18:30                                             | <b>Closing Remarks</b>                                                                                           |
