

SEARCH PARAMETERS

- **COMPANY NAME**
- **RGSEAA NUMBER:** This identification number is divided into three parts. The **left section** consists of one or two digits; the **center section** is a numerical field of six digits, where leading zeros are insignificant; and the **right section** consists of the province's identifying letters where the establishment is located.
- **KEY:** This is a dropdown menu that includes a classification of food sectors. Seventeen specific codes and two multipurpose codes are distinguished (see code list, categories, and activities information).
- **CATEGORY:** A dropdown with six options appears. To use this parameter, the code must have been previously chosen.

Specific activities (specific phases of the food chain)

Storage (product type)

Distribution (product type)

Packaging (product type)

Manufacturing or Processing or Transformation (product type)

Importation (product type)

- **ACTIVITY:** To use this parameter, the code and category fields must be filled in. A dropdown of specific activities or products specific to the sector is offered.
- **AUTONOMOUS COMMUNITY**
- **PROVINCE**
- **LOCALITY**
- **ESTABLISHMENTS SUPPLYING RAW MATERIALS FOR FEED/** in accordance with R(EC) 183/2005. When selecting this check, the search engine will select companies that market their by-products for use in feed manufacturing. This economic activity is independent of the company marketing animal by-products in accordance with R(EC) 999/2001, which can be consulted in the [Authorized Establishments Search Engine in accordance with R\(EC\) 853/2004](#).

Once a search is performed, all data can be exported to an Excel file with the button that appears below the results table.

The data entered in the Company Name and Locality fields do not need to be exact and should be entered without accent marks. The returned results will contain the entered character string.
